SERRATURE ELETTRICHE A CATENACCIO ROTANTE - Istruzioni di montaggio

ELECTRIC LOCKS WITH ROTATING DEADBOLT - Mounting Instructions

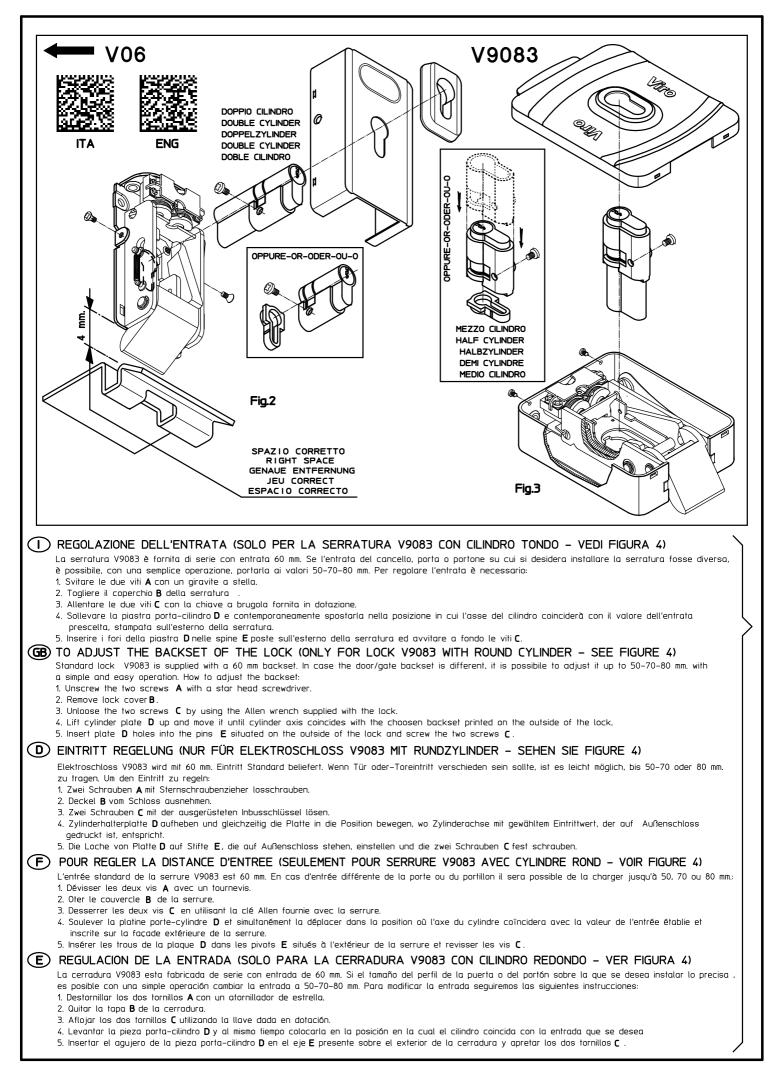

(D) ELEKTROSCHLÖSSER MIT DREHENDEM RIEGEL – Montageanleitung

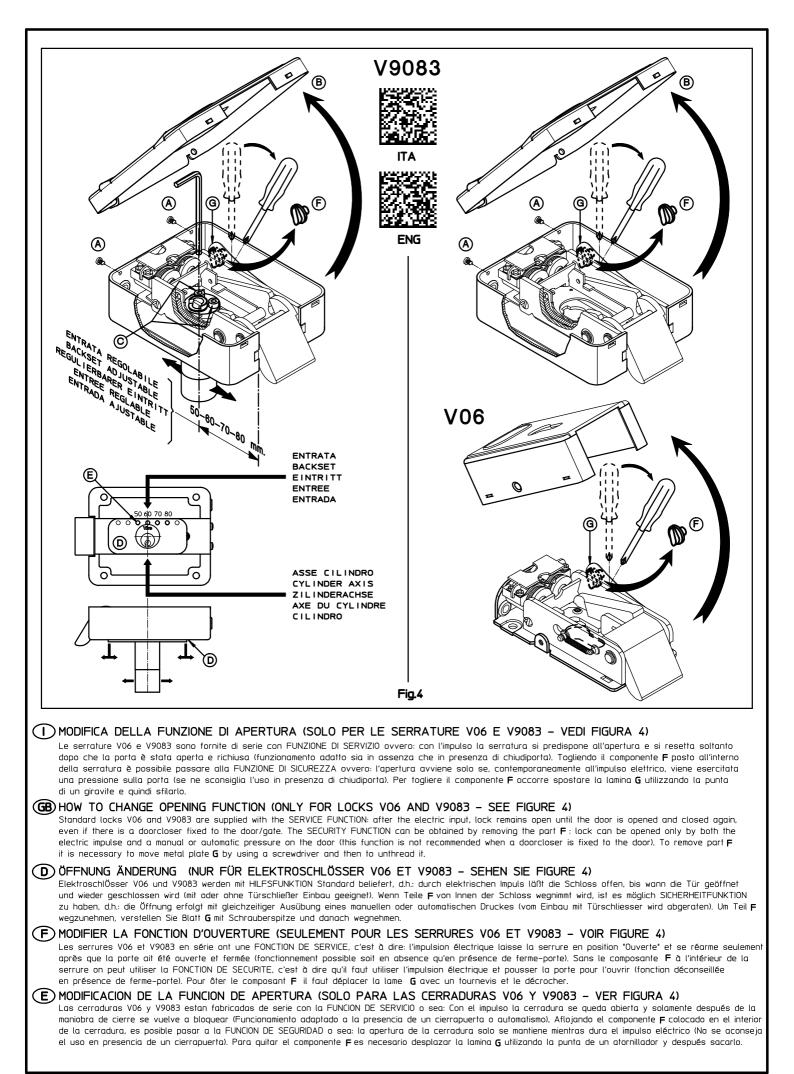

E SERRURES ELECTRIQUES PENE DORMANT ROULANT - Instructions de montage

E CERRADURAS ELECTRICAS A CIERRE GIRATORIO - Instrucciones de montaje

Es posible utilizar cualquier cilindro de pertil europeo y leva DIN o universal. La dimension del cilindro estara en base al espesor de la puerta o porton sobre el cual se quiere instalar la cerradura utilizando las indicaciones de la figura 1. Para el montaje del cilindro, seguir las instrucciones ilustrativas en la figura 2 y 3 (ver pagina 2) según el modelo. Nota: En el caso de instalación de tejadillo antilluvia aumentar la cuota **Y** en 5 mm.

COLLEGAMENTO ELETTRICO (Fig. 7)

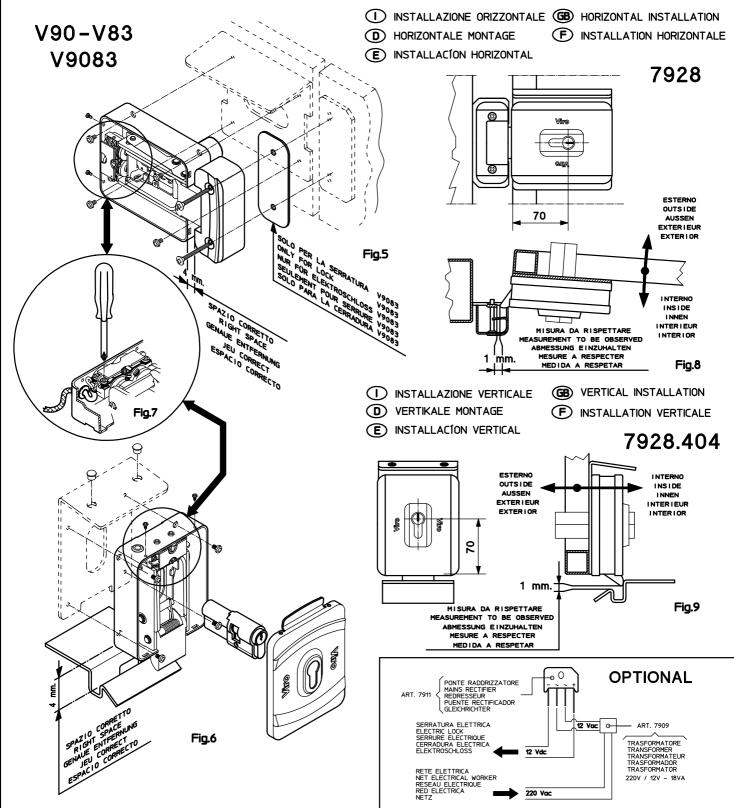

Collegare i cavi di alimentazione alla morsettiera della bobina facendoli entrare sotto ai piastrini di contatto e stringendo le due viti di serraggio. Si raccomanda di realizzare l'impianto elettrico conformemente alle normative CEI vigenti e di alimentare la serratura con trasformatore a norme CEI (o equivalente) di caratteristiche uguali a quelle indicate sulla scatola. Viro non assume responsabilità per gli eventuali danni causati dal mancato rispetto delle norme.

D ELEKTRISCHER ANSCHLUSS (Fig. 7)

Die Speisekabel an Klemmenbrett der Spüle durch Eintritt unter Kontaktplatte verbinden und die zwei Anziehenschrauben fast schrauben. Es wird empfohlen, das elektrische System in Übereinstimmung mit den anwendbaren nationalen Vorschriften durchzuführen und das Schloss durch einen Stromwandler entsprechend die nationalen Vorschriften und die Eigenschaften, wie auf der Verpackung gezeigt, zu speisen. Viro übernimmt keine Verantwortung für Schaden, wenn man nicht die Normen folgt.

E CONEXION ELECTRICA (Fig. 7)

Sujetar el cable de alimentación a la regleta de la bobina haciéndolo entrar en la zona de contacto y apretando los dos tornillos de fijación. Se recomienda realiza la instalación en conformidad con las normas nacionales en vigencia y alimentar la cerradura con un transformador conforme con las normas nacionales en vigencial de características iguales a las que figuran en la caja. Viro no asume la responsabilidad por los eventuales daños causados por no respetar las normas de instalación.

(GB) ELECTRIC CONNECTION (Fig. 7)

Connect power supply cables to the coil terminal board and screw the locking screws. It is suggested one electric system realized in compliance with the national standards in force and a power supply trasformer made in compliance with the national standards in force and with same features required in the lock packaging. Viro is not responsible for any damages caused by inobservance of the rules.

F BRANCHEMENT ELECTRIQUE (Fig. 7)

Brancher les câbles d'alimentation à la barrette de connexion de la bobine et revisser fortement les deux vis de fermeture. Il est recomandé d'utiliser un schéma électrique conformément aux normes nationales en viguer et l'alimentation de la serrure avec un transformateur conforme aux normes nationales en viguer et ayant les mêmes caractéristiques que celles indiquées sur la boite. Viro ne prendra aucune responsabilité pour dommages éventuels causés par le non respect des normes.

EC DECLARATION OF CONFORMITY FOR MACHINES (DIRECTIVE 2006/42/EC)

Manufacturer:VDS AUTOMAZIONI srlAddress:VIA CIRCOLARE PIP N. 10 65010 SPOLTORE (PE)

Declares that: mod. 106

is built to be integrated into a machine or to be assembled with other machinery to create a machine under the provisions of Directive 98/37/EC;

conforms to the essential safety requirements of the following EEC directives:

2006/95/EC Low Voltage Directive 2004/108/EC Electromagnetic Compatibility Directive

and also declares that it is prohibited to put into service the machinery until the machine in which it will be integrated or of which it will become a component has been identified and declared as conforming to the conditions of Directive 2006/42/EEC and subsequent amendments.
